PROFESSIONAL SUMMARY

QA Engineer and Full-Stack Developer with 3 years of experience in test planning, automated testing, and quality assurance for web and real-time systems. Skilled in React, TypeScript, Node.js, PostgreSQL, and end-to-end quality ownership across the SDLC.

TECHNICAL SKILLS

Testing & QA: Cypress (E2E), Vitest, Playwright, Manual Testing, Test Case Authoring, Defect Triage
Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, PHP, Python
Frameworks & Libraries: React, Node.js, Angular, Vite, TanStack Start, TanStack Query, Tailwind CSS, Capacitor, TensorFlow
Databases & Backend: PostgreSQL, MySQL, Supabase, Deno, Vanilla PHP, RESTful APIs, WebSockets
DevOps & Tools: Docker, Git, GitHub, Vercel, Netlify, Postman, Figma
Concepts: Full-Stack Development, Agile/SDLC, SEO Optimization, CI/CD, Real-Time Systems, OOP, Test-Driven Development

EXPERIENCE

Volunteer Software Development Engineer in Test (SDET) and Production Staff **Jan 2024 - Present**
I Care Center | *Olongapo City, Philippines*

- Authored and maintained 205 automated tests (158 Deno and 47 Cypress E2E) for the church website, strengthening regression coverage and production reliability.
- Designed and executed 20 Playwright test plans covering UI, API, and WebSocket integrations for the OBS–ProPresenter Remote Control system.
- Diagnosed and resolved 25+ production bugs across web and livestream systems, documenting recurring defects.
- Rebuilt the church website from legacy Weebly into a custom full-stack platform serving 7 ministries, with end-to-end SDLC ownership.
- Engineered and deployed a real-time OBS–ProPresenter remote control system using WebSockets.
- Developed an automated camera-monitoring agent that reduced livestream misclicks by 20%.
- Supported 140+ live productions using OBS, ProPresenter, and multistreaming infrastructure, identifying and correcting 90+ pre-broadcast errors.
- Collaborated with a 7–13-member production team to maintain reliable weekly operations.

Software Development Engineer in Test and Bookkeeper **May 2023 - Present**
TDA Car Rental | *Olongapo City, Philippines*

- Engineered a custom offline desktop application for internal financial management, automating the creation of billings, quotations, and receipts to save up to 15 minutes of manual preparation time per document.
- Designed and authored 20 Vitest test cases (E2E, Regression, Unit) targeting the billing, internal pdf signatures, quotation, and acknowledgement receipt modules, ensuring reliable performance and accurate data rendering.
- Prepared more than 180 client billings and recorded receipts, billing statements, and customer rates for financial monitoring.
- Processed 15 percentage and income tax returns via the BIR eBIRForms system.
- Performed basic bookkeeping and responded to 100+ customer inquiries via email.

EDUCATION

Gordon College | Olongapo City, Zambales, Philippines (GPA: 92.64) **~July 2027**
B.S. in Computer Science
Relevant Courses: Intelligent Systems, Software Engineering 1 & 2, Project Management, Data Structures and Algorithms

PROJECTS

Botcha Buster (Thesis) | React, Tanstack Query, Capacitor, Playwright, Node.js, Supabase, PostgreSQL, TensorFlow, MobileNetV3-Small

- Built a Progressive Web App (PWA) for DTI and City Veterinary Office meat inspectors to detect spoilage and double-dead meat.
- Designed a full E2E, Unit, and Regression test suite containing 102 tests using Playwright for testing.
- Trained a MobileNetV3-Small model with Python and TensorFlow using 25,000+ pork images to achieve 90% accuracy.

Jazrielle | React, TanStack Query, Node.js, Python, FastAPI, Tauri, Qwen3, llama.cpp

- Developed a lightweight local AI desktop assistant capable of interpreting natural-language requests and executing approved system actions.
- Integrated on-device LLM inference with a structured tool-calling layer for Windows and developer workflows.
- Implemented persistent memory and contextual retrieval to retain relevant information across conversations and sessions.

ExamHub - Exam System (FE/BE Final Project) | React, Tanstack Start, Tailwind CSS, MySQL, Vanilla PHP

- Developed a full-stack system with AES-256-GCM encryption on sensitive examination data
- Integrated a full scale anti-cheat system prohibiting multi-monitor set-ups, right clicks, tab-outs, and more.
- Improved accessibility and usability for students on mobile devices
